"A Century of Service to the Nation"

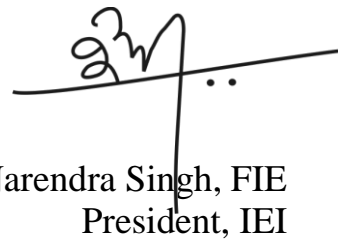

MESSAGE

I am happy to note that the Kuwait Chapter of The Institution of Engineers (India) is organizing the 3rd International Conference on "Engineering Challenges in Gulf countries" on 22 January 2021 on virtual platform.

I understand that the deliberations on the topic would cover all issues related to gulf region and ways and means to face various challenges and engineering solutions to overcome them. Engineers of the gulf countries would have to play a vital role towards evolving effective methodology in facing and overcoming various challenges faced by the gulf populace. Kuwait Chapter of The Institution of Engineers (India) has been playing significant role in dissemination of technical information amongst the engineering fraternity. I am confident that the eminent speakers will highlight salient features on the topic for knowledge base of the participants and stakeholders.

I am sure that the outcome and the recommendations so emerged out of the deliberations will benefit the policy makers, implementing agencies and all concerned stake-holders.

I extend my sincere greetings to the organizers for their efforts in organizing this Conference and wish the event a grand success.

Er. Narendra Singh, FIE
President, IEI
